Jannet C. Bencure

Department Head

Department of Geodetic Engineering

Visayas State University

Visca, Baybay City, Leyte

Dear Mx. Bencure,

I am thrilled to submit my application for the position of **Instructor I** for the Department of Geodetic Engineering, Visayas State University. I am passionate about learning, sharing, and expanding knowledge gained through academic and practical experiences.

From my previous employment, I have acquired skills and experiences that honed in me a comprehensive understanding of one of the unyielding pillars of geodetic engineering practice: surveying. This will enable me to exchange not only theories but also practical knowledge with my future students.

During my undergrad years, I volunteered to be the Math and Science instructor for aspiring students who wish to pass their college entrance tests. The said review was hosted by my socio-civic organization which I had the privilege of serving as Chairperson for a year. Though these kinds of activities operate on such a limited number of times, this review was still able to sharpen my ability to communicate concisely and effectively. It opened me up to the advantages of socializing with the students allowing them to experience their review as an avenue to learn and enjoy.

I've read and understood that the department is looking for a candidate who not only can teach but can also adapt to the changes in a learning environment brought by the pandemic. With my background and continuous improvement, I believe I am a good candidate for the said position. I know I can facilitate and deliver adaptive learning that gives importance to the welfare of students in a challenging setting.

Sincerely,

Ellarizza T. Fredeluces
