**MOISES NEIL V. SERIÑO**

Director, Visayas Socio-Economic Research and Data Analytics Center  
Dean, College of Management and Economics  
Visayas State University  
Visca, Baybay City, Leyte

**SUBJECT: Instructor Position for Visayas Socio-Economic Research and Data Analytics Center**

Dear *Dr. Seriño*,

I am Analine Legua interested to apply as Instructor in Visayas Socio-Economic Research and Data Analytics Center.

I am currently working as a Science Research Assistant of Philippine Root Crop Research and Training Center. I am part of the DOST funded project headed by Prof. Marlon M. Tambis entitled "Enhancing the Sweet Potato Food Value Chain Through Smart Technologies and Partnerships Towards Food Resiliency in the New Normal in Western Samar". I am assisting the community organizing activities with the sweetpotato farmers in Western Samar, helps in promotional activities of the sp product development produced by the project, project monitoring, and project management.

Prior to that, during my first job after I graduated, I was a Science Research Assistant at the Philippine Root Crop Research and Training Center (Philrootcrops) at Visayas State University. I was working on the project, Investment Portfolio of Selected Rootcrop Technologies wherein we developed business plans for the micro-enterprises interested in the root crop-based products. Another project was, Value Chain Assessments of the Agricultural and Coastal Microindustries in Marabut and Basey, Samar wherein the purpose of which is to assist in developing the local farming communities in the said municipalities in partnership with Food for the Hungry, a non-government organization. We conducted interviews on farmers, traders, sellers and consumers during the value chain assessment. Also, we assisted every exhibit to promote root crop products and a visit on root crop fields from time to time. After working as a Science Research Assistant, I decided to venture different kinds of job to enhance my self-confidence and to know my capabilities and limitations. Being a positive individual helps me to easily adjust on my working environment.

I do believe venturing different kinds of job and field will help us to be a better person and a worker as well. My job experiences help me to become flexible and accept changes right away which enhances my skills in building good relationship to every individual I have worked with. I immerse myself in new experiences to broaden my skills. Going back to the position, I would be grateful to develop my skills and learn more under your supervision or share my knowledge and skills. I hope you will consider this application. Thank you for your time and consideration.

Very truly yours,

ANALINE LAHER LEGUA
