DR. PROSE IVY GUASA-YEPES

President
Visayas State University
Baybay City, Leyte

Dear Ma'am,

I am writing to formally express my interest in the Instructor I position at the Southern Philippines Agri-Business and Marine Aquatic School of Technology.

I hold a Bachelor of Science degree in Biology with a major in Molecular Biology and Biotechnology. Currently, I am pursuing a Master of Science in Molecular Biology and Biotechnology with a cognate in Genetics at Central Mindanao University. My graduate studies have equipped me with in-depth knowledge and hands-on experience in microbiological techniques, molecular biology processes, and biotechnological applications. My master's thesis focuses on studying the virulence and antimicrobial resistance of *Vibrio cholerae* strains isolated from seafood, demonstrating my dedication to research in microbial pathogenesis and public health issues.

Between January and May 2025, I worked as an Instructor I at the Institute of Biological Sciences, Central Mindanao University, where I taught microbiology, cell and molecular biology, and genetics courses. This role enabled me to enhance my teaching methods, mentor students effectively, and incorporate the latest scientific research into my lessons. My commitment to both teaching and research motivates me to make meaningful contributions to your institution's academic objectives.

With my solid foundation in molecular biology, genetics, and microbiology, along with my enthusiasm for education and research, I am excited about the opportunity to join your distinguished faculty and help further the development of fisheries and natural sciences at Western Philippines University.

Thank you for considering my application. I look forward to the opportunity to discuss how my experience, skills, and passion align with the goals of your team.

Sincerely,

MATILDA GRACE I. CEMPRON
