## SUMMARY

I'm a licensed Agriculturist with a strong background in Plant Protection, particularly in Entomology. Over the years, I've gained valuable experience through both research and fieldwork, especially in areas like pest management and crop protection. I enjoy sharing what I've learned—both in theory and in practice—and I'm passionate about helping students connect classroom lessons to real-life agricultural situations. Teaching gives me the opportunity to guide and inspire future professionals in the field I love.
