Dear Ma'am/Sir,

Good Day!

I'm Melissa Joy R. Branzuela, 23 years old and completed Bachelor of Science in Agribusiness at Visayas State University. I'm interested in applying as a Science Research Assistant.

As a fresh graduate, I believe that I would be a great addition to your team to contribute a new perspective and a fresh environment. As part of our curriculum, I was able to get a good understanding of both Agriculture and business concepts. I worked for a summer job in Baybay LGU for four consecutive years, a part-time tutor during the pandemic. This helped me financially support my school needs and trained my management and communication skills as a young student. As a DOST scholar, I was also encouraged to be outgoing and face different kind of people. I worked as a part-time enumerator for Department of Agriculture-ACPC where I was able to interview small farmers. I have knowledge in conducting research while I was in high school and college.

I also possess effective Microsoft Office skills, allowing me to work on data encoding, creating spreadsheets and powerpoint presentations. Additionally, I have a good command of English, Filipino, and Cebuano languages. My university honed me to be able to work under pressure effectively and taught me to be flexible in terms of working with colleagues or independently.

I will be grateful if you consider me for this job position! I am looking forward to hearing a positive response. I can be reached through 09510446333 or email at melissajoybranzuela@gmail.com. Thank you for your time!

Sincerely Yours,

MELISSA JOY R. BRANZUELA
