**Professional Summary**

Detail-oriented and innovative Full stack Web Developer with over 9+ years of experience in designing, developing, and implementing web applications. Skilled in both front-end and back-end development, with a strong foundation in Laravel, CodeIgniter, Vue.js, and MySQL. Passionate about building clean, efficient, and user-friendly solutions to solve real-world problems.

**Objective**

Aiming to contribute to a forward-thinking tech team as a software developer while continuously improving my skills in full-stack development

**Work Experience**

- Full-stack Web Developer / *Visayas State University, Baybay City, Leyte* | August 2019 - Present
  - Develop the assigned Information System, a browser-based system utilizing PHP (Laravel framework), MySQL, Vue.js, and other similar tools for web development.
  - Integrated third-party APIs (e.g., email and Facebook login) into various applications.
  - Maintained and optimized existing systems to improve performance, security, and usability.
  - Used Git for version control and managed tasks using tools like Trello or Bitbucket.
  - Actively contributed to system architecture design, database schema planning, and feature enhancements.
- Full-stack Web Developer | *National Maritime Polytechnic Brgy. 97 Cabalawan Tacloban City, Leyte* | July 2016 - August 2019
  - Designed, developed, tested, and deployed scalable web applications using technologies such as PHP (CodeIgniter framework), AJAX, JQUERY, MySQL, and other similar tools for web development

- Gathers and analyzes user requirements and develops the system flow
  - Creates data tables relative to database development;
  - Design the System Interface; and
  - Present the finished product to the client.
- Software Engineer | *Geckotech Inc. Talamban Cebu City | January 2016 – June 2016*
  - Developed a browser-based information system using **PHP, AJAX, JQUERY, MySQL**, and other modern web technologies.
  - Gathered and analyzed user requirements to design system architecture and define system flow.
  - Created and managed relational database tables aligned with system specifications.
  - Designed intuitive and user-friendly system interfaces.
  - Conducted thorough quality analysis and system debugging following standard development practices to ensure performance and reliability.
  - Presented the completed system to the client, including functionality walkthrough and user support materials.
- Science Research Assistant and Assistant Programmer | *Visayas State University, Baybay City, Leyte | May 2015 – December 2015*
  - System modification of the current system using PHP (CodeIgniter framework), AJAX, JQUERY, MySQL
  - Data encoding, and
  - Data Gathering

## Technical skills

- **Languages:** PHP, JavaScript, Java, SQL, HTML, CSS, C#
- **Frameworks & Libraries:** Laravel, CodeIgniter, JSP, Vue.js, Bootstrap, jQuery, AJAX
- **Databases:** MySQL, MS SQL Server
- **Tools & Platforms:** Git, REST APIs, Postman, VS Code, Bitbucket, Trello, PHPStorm, NetBeans, Notepad++, Sublime Text
- **Other:** Agile/Scrum Methodology, Android Studio

## Education

Bachelor of Science in Computer Science (BSCS)  
 Visayas State University ---- 2011-2015  
 VisCA, Baybay City, Leyte, Philippines

## Certifications

- Advanced Laravel and Vue.js
- Digital Transformation ICT Project Management
- Cyber Security Training
- Basic Network Installation & Configuration
- Networking Management and Monitoring
- Recovery and Troubleshooting
- Assembly, Start-up, Configuration, Operation, Maintenance, and repair of various IT Equipment
- Web Development for web developers
- Web Accessibility Audit
- Cyber Security Framework
