NAME : CAGASAN, EDITHA GUNDAYA
AGE : 59
SEX : Female
ROOM # : 511
WARD : 5F
PHYSICIAN : DR. ROGER SY

HOSP. NO. : 692751
ADM.NO. : 475243
C.S. # : C2946281L

Histopath # : 23S - 2438
Sample Submitted : 05/08/2023
Date Reported : 5/12/2023 2:43:02PM
Date Charged : 5/8/2023 4:53:14PM

Specimen:

MASS, RIGHT MIDDLE LOBE LUNG MASS

GROSS EXAMINATION:

Received are few, tan, soft tissue fragments with an aggregate diameter of 4mm.
These are totally processed.

Gross Examination Done by: Dr. Delara O. Karimzadeh

MICROSCOPIC EXAMINATION:

Sections show fragments of malignant neoplasm. The latter composed of atypical cells exhibiting pleomorphic, hyperchromatic nuclei with moderate eosinophilic cytoplasm. These are seen forming nests and sheets. Mitotic figures are rare.

DIAGNOSIS:

Mass, Right Middle Lobe Lung Mass: CONSISTENT WITH POORLY DIFFERENTIATED ADENOCARCINOMA
