R E: Formulation of Courses of Action Addressing Constraints
in the Implementation of Research and Extension Projects

As a further follow up to the consultation conducted on November 5, 1992 regarding R & D implementation in VISCA, please constitute yourselves into a Special Task Force that shall monitor the implementation of all decisions given during the consultation. Should any problem arise that will cause any deviation from the original pronouncement, take appropriate actions immediately. May I suggest that the informal study conducted by ODREx entitled Financial Constraints in the Implementation of R & D Program be included as a reference.

Please be guided accordingly.
