**MEMORANDUM NO. 178**

Series of 2003

**T O: Dr. Roberto C. Guarte  
Dr. Victor B. Asio  
Dr. Eduardo O. Mangaoang  
Dr. Ma. Juliet C. Ceniza  
Dr. Remberto A. Patindol  
Prof. Manuel E. Casangcapan  
Mr. Dennis P. Peque**

**R E: Identification of Specific Points for Steel Tower Construction  
Along the LMIP Route**

In connection with the request of NPC/TRANSCO for approval of access and right-of-way for the Leyte-Bohol Interconnection Project (LBIP), with Dr. Roberto C. Guarte as Chairperson, please constitute yourselves into a committee to identify jointly with the NPC/TRANSCO group the specific points where the steel towers will be constructed along the LMIP route.

Please make yourselves available for the purpose and contact NPC/TRANSCO so that a date agreeable to both group can be arrived at.

Please be guided accordingly.

Office of the University/Board Secretary

**DR. JOSE L. BACUSMO**

Vice President for Research, Development & Extension  
and Officer-In-Charge  
Leyte State University

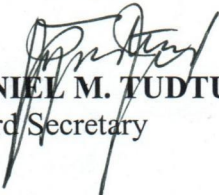

Dear *Dr. Bacusmo*,

This letter by Vice President Dominador S. Geonzon is a clarification of the letter sent to the Board of Regents relative to TRANSCO's request for Right-of-Way (ROW) for the Leyte-Bohol Interconnection Project (LBIP).

Please be informed that per agreement with NPC/TRANSCO representatives last 02 July 2003, the LBIP will follow the "footprints" of the Leyte-Mindanao Interconnection Project (LMIP) which the BOR had already approved. It was also agreed that a joint LSU-NPC/TRANSCO team be fielded to inspect the proposed LBIP route. For this purpose, Dr. Roberto C. Guarte was requested by President Paciencia P. Milan to lead the LSU counterpart team.

The Office of the LSU President will await the results of the ocular inspection before making the necessary endorsement to the Board of Regents for final action.

Respectfully,

  
**DANIEL M. TUDTUD**  
Board Secretary

**DR. PACIENCIA P. MILAN**

President

Leyte State University (LSU)

Baybay, Leyte

Subject : **REQUEST FOR APPROVAL OF THE GRANT OF  
ACCESS AND RIGHT – OF - WAY FOR THE  
LEYTE – BOHOL INTERCONNECTION  
PROJECT (LBIP)**

Dear Dr. Milan:

This has reference to the letter of the LSU- Board of Regents (BOR) Secretary, Mr. D. M. Tudit, Jr. dated June 19, 2003 to the undersigned, informing the decision of the BOR not to grant TRANSCO the Right-Of-Way through the property of LSU for as long as the true intent of ADCO Res. No. 20, Series of 2002 is not strictly followed.

First of all, please accept our sincere apology for the "*seemingly different*" interpretation from our part on that third option of ADCO resolution, as contained in our letter of 25 April 2003. We are happy to note, however, that the representations made last July 2, 2003 by TRANSCO delegations headed by our Mr. Dante M. Poloso, Cluster Head for Visayas Transmission Projects to personally apologize in my behalf and explain the matter has been well received and understood by your end as well as that of your Professor D.M. Tudit, Jr. and Dr. R.C. Guarte. We would like to assure you that we in TRANSCO has the best and true intentions in mind. Over the years, NPC/TRANSCO's dealings with you has always been sincere and transparent. LSU's requirements has closely been followed. Our interest is none other than the realization of this project which would provide immeasurable benefits not only in terms of a reliable power supply but also of the economic benefits it may bring to the Leyte and Bohol provinces in particular, and to the country as a whole.

Following the true intent of the aforementioned ADCO resolution, TRANSCO is proposing the following:

1. The LBIP will use the BOR approved route intended for TRANSCO's Leyte- Mindanao Interconnection Project (LMIP). LBIP's steel tower transmission lines will accommodate both the proposed 138 kV and the existing 69 kV lines in LSU;

2. The LMIP which implementation is being deferred to a much later date will be routed parallel and beyond the proposed LBIP route (Item 1 above).

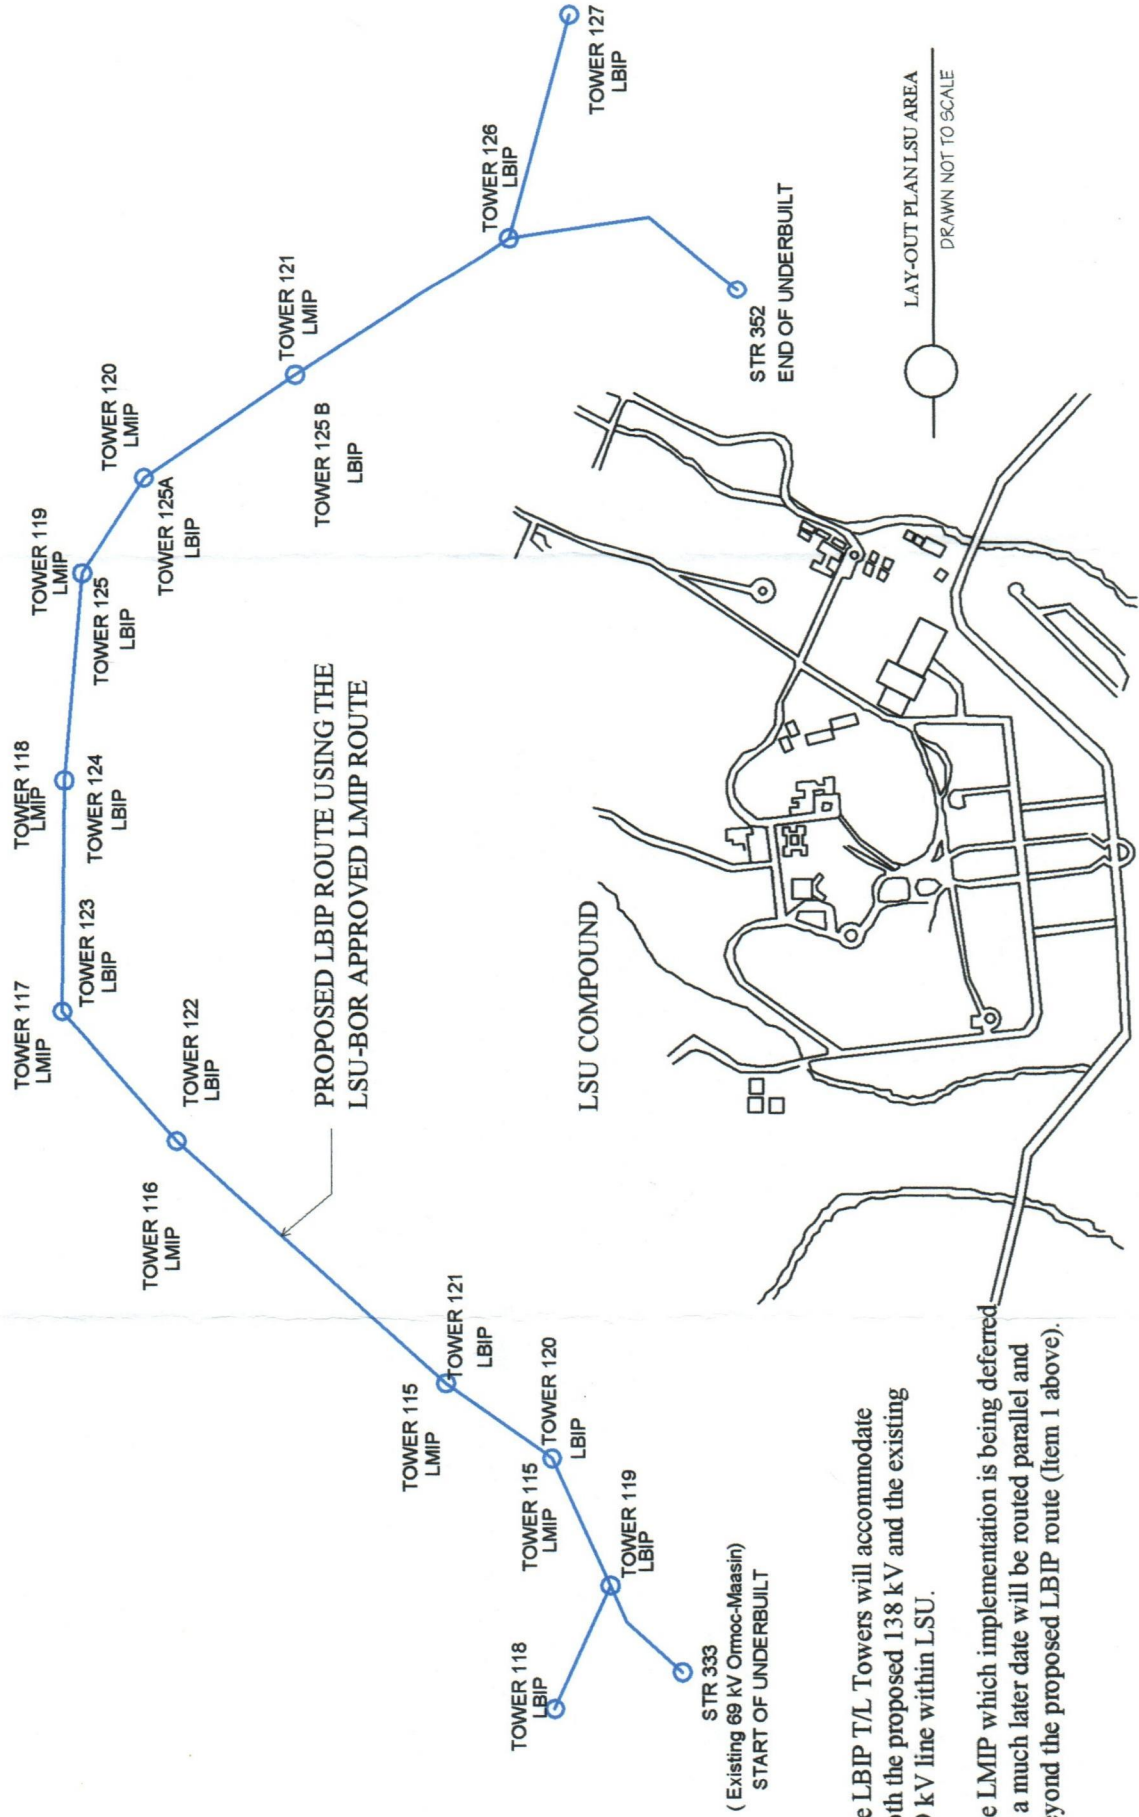

Thank you and we look forward that this would merit your kind consideration and favorable endorsement to the LSU's Board of Regents for our subject request. We remain.

Very truly yours,

**DOMINADOR S. GEONZON**  
Vice President – Project Management

W/ encls.: Route Sketch Plan

NOTE:

1. The LBIP T/L Towers will accommodate both the proposed 138 kV and the existing 69 kV line within LSU.
2. The LMIP which implementation is being deferred to a much later date will be routed parallel and beyond the proposed LBIP route (Item 1 above).
