MEMORANDUM NO. 89
Series of 1986

T O: All ViSCA Staff, Students and Other Campus Residents

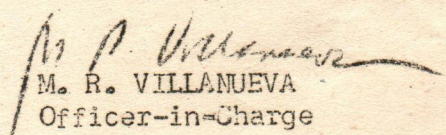

R E: Garbage Disposal

Due to problems related to the use of dump trucks, ViSCA is unable to undertake garbage collection on a regular basis. The help of every resident of the ViSCA Community is, therefore, earnestly requested to maintain sanitation and cleanliness on the campus. The following steps are suggested:

1. Avoid overfilling trash cans distributed around residential areas. Spillovers are scattered by wind and dogs making the place ugly and unsanitary.
2. Help in disposing garbage away from the residential areas. Residences with secluded backyards can dig garbage pits or dispose of trash by other means. Garbage can be made into compost and serve as good natural fertilizer for the garden.
3. Avoid throwing of garbage in the trash cans along the streets on weekends when collection is not usually done. Fish and other animal matters are specially attractive to dogs.

Let us all help in preserving the cleanliness of our community. Sanitation is important particularly around residential areas. Please call the attention of your neighbors who are not showing any concern on proper disposal of garbage.

Thank you.

M. R. VILLANUEVA
Officer-in-Charge
