With Dr. Jose M. Alkuino, Jr. as Chairman, you are constituted into a committee to identify and propose projects for the development of coastal areas between VISCA and Padre Burgos, Southern Leyte. People oriented development projects, with special attention on the poor, should be woven into an overall plan to improve and protect the environment. At this early stage of the work the committee should also foresee sustainability and maximum people participation as basic ingredients in the detailed project proposal preparation and implementation.

Watershed areas on the uplands can also be looked into because of the close relationship between coastal area siltation and watershed protection.

Please be guided accordingly.
