

17 July 2018

MEMORANDUM CIRCULAR NO. 46
Series of 2018

T O: All VSU Campus Residents

R E: Campus Cleanliness

In the past 27 weeks there were 39 cases of Dengue Fever referred for treatment in the VSU Hospital. In this connection, we would like to inform and remind the whole VSU community of DOH 4S protocol in the fight against Dengue:

1. Search and Destroy
2. Self-protective measure
3. Seek early consultation
4. Say no to indiscriminate fogging

To contain the possible spread of this infection, all VSU campus residents are directed to clean their surroundings and get rid of potential breeding places of the mosquito vector e.g. old tires, cans and flower pots that collect water. You are also encouraged to cut/prune banana plants and other potential habitats to reduce the mosquito vector population.

For compliance.

EDGARDO E. TULIN
President *enc 7/18/18*
