MEMORANDUM NO. 103
Series of 1989

T O: Dr. Eliseo R. Ponce

R E: Assessment of Land Needs for Research

In connection with the land acquisition problem besetting VISCA, it is necessary to make an assessment of the present situation for the purpose of planning. In this connection, please make the evaluation of the research needs for land considering the following points:

1. Total area needed for research classified into various categories based on needs and purpose.
2. Present area available and being utilized by category.
3. Additional area needed, if any, by category.

For your reference, attached is an advanced copy of the output claimed by Mr. Paciano Quirol to be the output of a three-man committee created by the BOT on July 7, 1989 to recommend mechanism to approach the land acquisition problem. You are expected to react to the suggested strategies presented under Section 1.3 for consideration by the Board.

Please submit your report on or before August 2, 1989.

M. R. VILLANUEVA
President
