8 March 1984

MEMORANDUM NO. 42  
Series of 1984

TO: PPO Superintendent, Manuel C. Capacio and  
DPP Head, Dr. Nelson M. Esguerra

SUBJECT: Termite-Extermination at the Home Science and  
other College Buildings

This Office has been informed that termites have built their tunnels up the concrete walls of the new Home Science building. The Home Science people tried to scrape the termite tunnels and sprayed with insecticide the grounds where the termites originated but, according to information, the termites keep going back to the building.

Based on this report, it is possible that other buildings are also being damaged by termites. Before it is too late, termite control program must be jointly developed by the Physical Plant Office with technical assistance from the Department of Plant Protection. One man must be trained for this purpose and a regular schedule of termite protection must be undertaken under the joint responsibility of PPO and DPP.

You are expected to take action on this matter as soon as possible.

  
F. A. BERNARDO  
President
