

Certificate of completion

of supervisor training for a household survey on land use planning and disaster risk management in the Philippines

ELENA I. MONTEROSO

has completed a 9-days training (72 hours) as a supervisor for a longitudinal household survey on land use planning and disaster risk management in the Philippines.

The training covered the following contents:

- Introduction to land use planning in the Philippines,
- Measurement of welfare and livelihood,
- Measurement of household exposure to natural hazards and natural disasters,
- Socio-political situation in municipalities and barangays,
- Code of conduct for supervisors.

The training covered the following organizational / management aspects:

- Supervision of a large group of field interviewers,
- Coordination and mentoring of field interviewers during training and fieldwork.

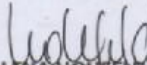

The training covered the following technical aspects:

- Application of tablet computers in a longitudinal household survey,
- Use of Open-Data-Kit (ODK) survey software including GPS-based geographic tracking and data management,
- Household selection and resampling applying a random route technique.
