**Rationale**

Last August 2021, the Department of Physics was established by virtue of the BOR Resolution No. 49, s. 2021. With the splitting of the now defunct Department of Mathematics and Physics, the Department of Physics was formed and now offers the BS in Applied Physics (BOR Resolution No. 450, s. 2019) starting A. Y. 2021- 2022. This year the department will commemorate its 1st Anniversary as a department with the theme "Physics as a Driver for Sustainable Development."

An anniversary celebration is one of the most significant occasions that serve as a reminder of how an organization, college, or department, among others, has developed and grown. The department's anniversary provides us with a unique opportunity to reflect on its accomplishments and areas where it may still make improvements to maintain the delivery of quality services. Additionally, the event will be key to advancing the department's program offerings and connecting with people/experts to motivate and inspire the faculty, staff, and students of the department. Hence, celebrating the Department of Physics' 1st year anniversary is necessary.

**Objectives**

At the end of the seminar/ workshop, participants will be able to:

1. Further promote the Department of Physics and its BS in Applied Physics program;
2. Gain understanding about the department's instruction, research, extension, and linkage;
3. Inspire participants about physics as a driver for sustainable development.

**Methodology/Strategy**

Parade/ motorcade, Opening Program, Blessing of the Department of Physics and Quiz Show (Hybrid modality)
