Admin Building, Maharlika Road, Brgy., Pangasugan
Baybay City, Leyte 6521

ATTENTION : Dr. Eduardo E. Tulin
University President

Dear Dr. Tulin:

Your business is our passion. We are committed to growing our partnership and tread the path to be your trusted business advisor.

As the corporate arm of Globe Telecom, Inc. ("Globe"), Globe Business provides a comprehensive range of Information Communication Technology (ICT) interconnectivity solutions for the country's top industries, businesses and commercial enterprises engineered according to their business requirements and enabling them continuous access to information. Our portfolio of products and services consist of mobile, wireline, broadband, data connections, internet, managed services and Information Technology (IT)-enabling services as well as cloud computing solutions which we pioneered in the country.

On top of our business solutions, you can count on our dedicated after-sales team for constant assistance in order to give you the best customer experience possible.

Utilizing our fully-owned and managed infrastructure, we would like to present **SESSION INITIATION PROTOCOL [SIP] TRUNK** (the "SERVICE"), a business solution that allows companies with an Internet Protocol – Private Branch Exchange (IP-PBX) equipment to use the Internet Protocol (IP) network in lieu of conventional telephone trunks to communicate with fixed and mobile telephone subscribers. The Service allows companies to run voice calls over the public internet instead of the conventional private network setup, therefore enabling the use of the existing Innove Direct Internet Service and eliminating the need for a separate local loop and last mile installation. It has **INNOVE COMMUNICATIONS, INC.**, (the "INNOVE", a wholly-owned subsidiary of Globe, as its service provider.

Service Benefits:

- **Cost-Efficient**

- Pay only for the channel capacity the Customer needs or subscribes to.
- Additional channel capacity may be availed by the Customer in small quantity.
- No need for a separate build-out.
