**T O: PROF. MARIA AURORA TERESITA W. TABADA**

**R E: Justification of the Department of Computer Science and Technology half day lecture on Anti-Sexual Harassment Seminar for OJT students**

As per the request of Dr. Jude B. Rola, CET OJT Coordinator we are proposing an activity entitled "Pre-OJT Orientation and Anti-Sexual Harassment Seminar for OJT Students" that will be held on June 7, Wednesday if your time permits, at 8:00 until 4:00 A.M at the RDE hall with the OJT students as participants. This said activity is for the College of Engineering 4th year OJT students.

This whole day activity is essential for the said attendees for them to be able to protect themselves by being aware of their rights if caught in situations that may make them feel harassed or uncomfortable. Handling over this basic situation is needed and that is why it is needed to be tackled in this seminar. When the students work in the field at their young age, they may be exposed to this circumstances that make them confuse on how to react to the situation. In this case, with the guidance of professionals on this field, this seminar will equip them with the knowledge on handling abuse and harassment all throughout their on the job training.

Thank you,
