Item #	Item Description	Unit	Qty	Unit Cost	PAR/ICS	Total Cost
1	DHLPPi (Recombitek C6) Dog Vaccine	Vial	10	400.00		4,000.00

Specification:

(DHLPPi/ 5in1 dog vaccine)

Canine Distemper-Adenovirus Type 2-Parainfluenza-Parvovirus Vaccine

Modified Live Virus, Live Canarypox Vector, Leptospira Canicola-Icterohaemorrhagiae Bacterin

Vaccine Brand: Recombitek C6

company: Merial

(Justification: This brand is proven to cause lesser vaccination failures and allergic reactions in dogs compared to other brands of 5in1 vaccine)

DESCRIPTION: RECOMBITEK® C6 contains a lyophilized suspension of a recombinant canarypox vector expressing the HA and F glycoproteins of canine distemper virus; modified live adenovirus type 2, parainfluenza virus, and parvovirus; and a liquid suspension of inactivated cultures of *L. canicola* and *L. icterohaemorrhagiae*. Safety and immunogenicity of this product have been demonstrated by vaccination and challenge tests in susceptible dogs.

INDICATIONS: RECOMBITEK® C6 is recommended for the vaccination of healthy dogs 6 weeks of age and older for prevention of disease due to canine distemper virus, canine parvovirus, canine adenovirus type 1 (canine hepatitis), canine adenovirus type 2 (canine respiratory disease complex), canine parainfluenza virus, and the bacteria *L. canicola* and *L. icterohaemorrhagiae*.

DOSAGE: Reconstitute the lyophilized vaccine with accompanying liquid diluent and aseptically inject 1 mL (1 dose) subcutaneously or intramuscularly into healthy dogs. For primary vaccination, revaccinate with a second 1 mL dose 2 to 3 weeks later. Dogs younger than 12 weeks of age should be revaccinated with a single 1 mL dose every 2 to 3 weeks, the last dose given at or over 12 weeks of age. Revaccinate annually with a single 1 mL dose.

PRECAUTIONS: Store at 2-7°C (35-45°F). Do not freeze. Use immediately after reconstitution. Do not use chemicals to sterilize syringes and needles. Burn container and all unused contents. Contains gentamicin as a preservative. It is generally recommended to avoid vaccination of pregnant dogs. In rare instances, administration of vaccines may cause lethargy, fever, and

inflammatory or hypersensitivity types of reactions. Transient lethargy, as well as pain and swelling at the site of injection, may occur following use of this product. Treatment may include antihistamines, anti-inflammatories, and/or epinephrine, as directed by a veterinarian.

SOLD TO VETERINARIANS ONLY.

2	Digital Thermometer	pieces	6	110.00		660.00
3	gloves surgical, sterile, powder free 7.0	box of 50 pairs	2	900.00		1,800.00
4	Zoletil 50	Vial	5	1,850.00		9,250.00

Specification:

Zoletil 50 ® is an anesthetic agent for veterinary surgical and diagnostic procedures. It is a safe and effective anesthetic with a high therapeutic index and limited side effects.

Zoletil 50 ® can be used as the sole anesthetic and to induce anesthesia before gas anesthesia.
